SUMMARY

Senior Software Engineer with 6+ years of experience building production full-stack applications with a strong front-end focus using Next.js, React, and TypeScript. Experienced in owning complex front-end architecture and AI-native experiences including streaming LLM responses, conversational interfaces, tool interactions, and data-rich applications. Hands-on across the stack with Node.js, NestJS, Prisma, PostgreSQL, and modern cloud infrastructure.

TECHNICAL SKILLS

Frontend	TypeScript, JavaScript, React.js, Next.js, PrimeReact, DataTable, TreeTable, HTML5, CSS3, D3.js, SVG, Accessibility, Figma
AI & UI	Streaming LLMs, Chat UI, Tool-Call Rendering, Optimistic UI, Voice/TTS, LangChain, LangGraph, RAG, State Management
Backend & Data	Node.js, NestJS, Express.js, Prisma, Python, FastAPI, PostgreSQL, MongoDB, REST APIs, Streaming APIs
Engineering	AWS, Docker, CI/CD, Git, Front-End Testing, Code Review, Performance Optimization, Design Systems, Documentation

EXPERIENCE

TOPTAL — Senior Software Engineer 2025 – Present

- Own front-end development for an AI-native web application using Next.js, React, and TypeScript, driving architecture, implementation, testing, performance, and production delivery.
- Build conversational AI experiences with streaming LLM responses, tool-call rendering, optimistic UI, persistent state, and responsive real-time interactions.
- Develop reusable, accessible components and data-dense interfaces while partnering with designers through Figma to translate product designs into production experiences.
- Work across the stack with NestJS and Prisma on API contracts, streaming behavior, schema evolution, code reviews, CI, and technical documentation.

ARBISOFT — Senior Software Engineer (Insurify) 2022 – 2025

- Led full-stack development of enterprise applications using React, TypeScript, Node.js, PostgreSQL, and MongoDB, owning features from technical planning through production release.
- Built reusable front-end components and API-driven workflows while maintaining systems serving 50K+ daily API requests.
- Reduced API latency by 30% through caching and database optimization and decreased front-end/backend integration issues by 30% through stronger API contract planning.
- Contributed to architecture, security, code reviews, and CI/CD practices, helping reduce deployment cycles from days to under 1 hour.

DEVSINC — Software Engineer 2020 – 2022

- Built full-stack web applications using React, JavaScript/TypeScript, Node.js, REST APIs, and database-backed services for enterprise workflows.
- Developed backend modules and API-driven front-end features supporting applications with 10K+ monthly users while improving internal workflow processing time by 18%.
- Optimized database access to reduce report generation time from 8s to 5s and implemented authentication and RBAC for secure application workflows.
- Delivered features across 15+ production releases, contributing to API design, testing, debugging, and production support.

PROJECTS

TUTORLY AI — AI Learning Platform

Next.js, React, TypeScript, PrimeReact, NestJS, Prisma, LangChain, PostgreSQL, AWS

- Built AI-powered learning experiences with conversational assistance, interactive student workflows, streaming responses, and reusable React components.
- Developed responsive, data-rich interfaces and integrated AI workflows with backend services, focusing on asynchronous state management, performance, and intuitive learning experiences.

MENUCLICK — Food Ordering & Delivery Platform

Next.js, React, TypeScript, PrimeReact, NestJS, Prisma, PostgreSQL, AWS

- Built a DoorDash-style platform supporting restaurant discovery, menu browsing, cart and checkout flows, order management, and real-time status updates.
- Developed reusable React components and data-dense interfaces while integrating NestJS/Prisma APIs with predictable state management, responsive design, and performant user interactions.

EDUCATION

Bachelor of Computer Science — PUCIT, Lahore, Pakistan 2016 – 2020
